Checklist of Oklahoma Amphibians and Reptiles

This checklist of the herpetofauna occurring in Oklahoma was compiled based on *A Field Guide to the Reptiles and Amphibians of Eastern and Central North America* by Conant and Collins, *A Field Guide to Western Reptiles and Amphibians* by Stebbins, and *Herpetology* by Vitt and Caldwell. These references and others are included on the back cover of this checklist.

Herpetology

Herpetology is the study of reptiles and amphibians, two groups of animals with fascinating life histories. Worldwide, approximately 6300 species of amphibians (frogs, salamanders, and caecilians) and 9200 species of reptiles (turtles, crocodylians, tuataras, lizards, and snakes) are recognized.

From the Ozark and Ouachita Mountains in the east, to the prairies of the west, Oklahoma is home to many diverse habitats supporting 54 species of amphibians and 82 species of reptiles.
